Notes:

Released as of 30 April 2026

All of the above data are based on the latest available information, as reflected in the submitted reportorial requirements and permits issued to all NPPs, MGSPs, DUs, and NPC-SPUG.

Installed Capacity - nameplate capacity; full-load continuous gross capacity of a unit under specified conditions, as calculated from the electric generator nameplate based on the rated power factor.

Dependable Capacity - maximum capacity when modified for ambient limitations for a specified period of time, such as a month or a season.

Installed and Dependable Capacity values may be updated as necessary.

This list covers the existing power plants in off-grid areas, excluding the microgrids under the Philippine Rural Electrification Service (PRES) Program in Masbate and Ticao Islands.

For Solar Power Plants: Installed Capacity are MWP or MWDC values while Dependable Capacity are MWAC values

in BLACK - NON-NPC (NPP, IPP, MGSP or DU)
